

# Arafat Khan

arafat.da.khan@gmail.com | arafatkatze.github.io | Canada | Twitter

Founding engineer at Cline, the open-source AI coding agent used by 4M+ developers, and an AI Engineer World's Fair speaker. I build production AI systems end to end — from agent harnesses and evals to the infrastructure that scales them.

---

## EXPERIENCE

### Founding Engineer · Cline

2025 – Present

- Founding engineer on Cline, the open-source AI coding agent used by 4M+ developers.
- Spoke at the AI Engineer World's Fair on 'Evals Are Broken, Use Them Anyway' [www.youtube.com/watch?v=QuulywMG4s8](https://www.youtube.com/watch?v=QuulywMG4s8)

### AI Engineer at Cody Team · Sourcegraph

2024 – 2025

- Built an enterprise AI coding assistant

### Founder · ImmigrantFirst

2023 – 2023

- Built a state of the Art LLM framework to build O-1 visa applications for US immigration using Generative AI [immigrantfirst.ai](https://immigrantfirst.ai)

### Infrastructure Engineer · Shopify

2021 – 2023

*Restricted Infrastructure and Stacks Team*

- Co-Implemented a load balancer level splitting of read and write requests using Kubernetes for Shopify's financial transaction application which improved the p99 request times across most of Shopify's payment transactions by 50%.
- Enhanced networking/infra pipeline to make our payments infrastructure fully compliant with PCI/DSS regulations to pass the audit.
- Built, maintained and upgraded highly scalable, fault tolerant Mysql database for critical credit card data

### Backend Engineer · Shopify

2019 – 2021

*Risk Engineering Team*

- Built a major tech design for a technical pipeline touching multiple rails services to find major bottlenecks in Shopify's fraud assessment flow and to improve the checkout latency by 60%.
- Managed autoscaling for Black Friday sales as the traffic spiked 10x the normal limit

### Researcher · Simon Fraser University

2017 – 2018

- Applied ML techniques on CT Scans of Body segments for FAT analysis and body composition labelling for cancer patients

---

## EDUCATION

### Bachelors and Masters in Technology · Indian Institute of Technology, Kharagpur

2014 – 2019

*Coursework: Probability, Algorithms, Programming Languages, Introduction to Electronics, Stochastic Processes, Machine Learning, Operating Systems, Distributed Systems*

---

## PUBLIC SPEAKING

- AI Engineer World's Fair: Evals Are Broken, Use Them Anyway (2026) — [watch](#)
- DevOpsDays Recife: Digital nomading in tech (2022) — [talk](#)
- GopherCon India: Algo visualizations in Go (2019) — [conference](#), [project](#)
- Google Developers Windsor: Tensorflow Ruby (2019) — [event](#)
- GoWayFest Belarus: Visualizations in Go (2018) — [project](#)
- Ruby on Ice, Germany: ML workshop (2018) — [talk](#)
- EuRuKo Ruby Conf: Introducing Tensorflow Ruby (2017) — [video](#)

---

## OPEN-SOURCE PROJECTS

### Tensorflow.rb — I wrote Tensorflow for Ruby

- Spoke about this project at many tech conferences all over Europe and North America
- Project was eventually endorsed by Ruby Association
- Project trended on Github for a few days

### Dataviz — A perfect algorithms explanation library written in Golang

- Designed a user-friendly codebase to understand complex algorithms visually
- Presented my work at Gophercon in Belarus and India

### Glott — A plotting library in Golang built on top of GNU Plot

- Added golang support for styles like lines, points, bars, steps, histogram, circle

- Presented my work at Gophercon in Belarus and India

## AWARDS

---

- **Google Summer of Code**, Scientific Ruby Foundation (2018) — Built the best plotting library for Ruby to support visualizations for science experimentation in Ruby [github.com/SciRuby/rubyplot](https://github.com/SciRuby/rubyplot)
- **Ruby Grant**, Ruby Association (2016) — Official Grant from Ruby Association to build Tensorflow in Ruby [github.com/somaticio/tensorflow.rb](https://github.com/somaticio/tensorflow.rb)

## LANGUAGES

---

Hindi (Native speaker), English (Native speaker), Urdu (Native speaker)
